TECHNICAL SKILLS

Languages: JS (ES6+), TypeScript, C++, Python

Frontend: React, Next.js, React Native, Tailwind, shadcn/ui

Backend: Node.js, Express, FastAPI, REST, GraphQL, tRPC

AI & Cloud: Gemini AI, OpenAI, Azure Face API, Computer Vision

Databases: MongoDB, PostgreSQL, MySQL, Prisma, Neon

DevOps: Azure, Vercel, Render, Docker, CI/CD, Git

Auth: Clerk, JWT, Passport.js, Zod, OAuth 2.0

State: Redux, TanStack Query, React Hook Form

EDUCATION

B.Tech — IT

SJPML Institute of Engg. & Technology, Radaur
2022 – 2026

Higher Secondary (PCM)

Satluj Public School, Ellenabad
2021

ACHIEVEMENTS

- **Uni Topper:** Ranked 1st of 150+ peers, 5th Semester
- **SIH 2024:** Led 5-member team vs 250+ participants
- **DSA:** Solved 150+ problems in C++ on TUF+
- **Certs:** Full Stack MERN + Azure AI (Infosys ICT Academy)
- **NSS:** Community leadership, institute level

PROFILE

Final-year B.Tech (IT) student and Full Stack AI Engineer with hands-on experience in MERN, Next.js, and TypeScript. Proven integrator of AI/ML services — Google Gemini, Azure Cognitive Services, OpenAI — into production-grade, user-facing products. Internship outcomes: 40% DAU growth, 80% manual workflow reduction.

EXPERIENCE

Full Stack Developer Intern

Jul – Sep 2024

[Excellence Technologies](#) · Mohali, India

- Engineered high-conversion Next.js landing pages for an eCommerce platform, improving load times and conversion UX.
- Built a React Native app with offline sync and real-time chat (Socket.io), directly driving a 40% DAU increase.
- Automated FAB Builder & eCommerce workflows, cutting manual effort by 80% and resolving 15+ critical bugs.
- Added CMS blogs, search/filter to Dreamits; delivered responsive UI overhauls for Norpack, Jaquar, and Gotc.

AI & ML Trainee

2023

[Infosys – ICT Academy](#) · Remote

- Completed Azure AI Services training covering Python ML, Azure ML Studio, NLP, and Computer Vision.
- Deployed Azure Computer Vision image classification app (Streamlit) achieving 92% accuracy.

PROJECTS

AI FiTrack — Fitness Tracker

[React](#) · [TypeScript](#) · [Strapi](#) · [Google Gemini AI](#) · [Azure Maps](#)

- Gemini-powered MET calorie estimation, FitBot AI, webcam food capture, PDF profile export, dark animated UI.
- Secure password reset (token hash, expiry, rate-limit, OAuth detection); deployed Vercel + Strapi Cloud.

Smart Attend — AI Attendance System

[FastAPI](#) · [Azure Face API](#) · [InsightFace](#) · [React](#) · [MongoDB](#) · [Docker](#)

- Built a face-recognition system with end-to-end persistence — migrated ephemeral storage to MongoDB, cached ML models in Docker, and resolved \$lookup aggregation bugs to stabilize the inference pipeline for production.
- Diagnosed and fixed three critical infrastructure failures in a face-recognition service: replaced volatile in-memory storage with MongoDB, eliminated model reload overhead via Docker layer caching, and patched broken \$lookup joins in the aggregation layer.

Real-Time Chat App — Spam Detection

[Node.js](#) · [Socket.io](#) · [React](#) · [MongoDB](#) · [TF-IDF](#) · [Logistic Regression](#)

- Built and integrated a TF-IDF + Logistic Regression spam classifier achieving 94% accuracy, auto-filtering malicious messages in real-time before delivery to the chat pipeline.
- Deployed on Vercel with JWT-based session security, optimised server response time, and a fully responsive React frontend enabling seamless real-time communication.

LibraryOS — Library Management SaaS

[React](#) · [TypeScript](#) · [Node.js](#) · [Express](#) · [MongoDB](#)

- Engineered a production-ready Library Management SaaS for Indian institutions featuring a glassmorphism dark UI, INR currency localisation, and DD/MM/YYYY date formatting — achieving a fully responsive, pixel-perfect experience across devices.
- Deployed end-to-end on Render (REST API) + Vercel (frontend) with a clean CI/CD pipeline; implemented role-based access, secure JWT authentication, and an amber/navy design system tailored for institutional use.
